

# More Concrete & Walls

October 2 – 7

Time goes by very quickly. I'm so sorry that I've gotten way behind in posting the happenings with the Build, but I have been taking pictures. I will attempt to get caught up tonight! At the end of September they had just filled the walls of the basement and, of what I now realize is, the crawl space under the chapel—in the picture at the left below they are the walls in the foreground.

Basement floor concrete being poured

Pumper Truck Controller on the job

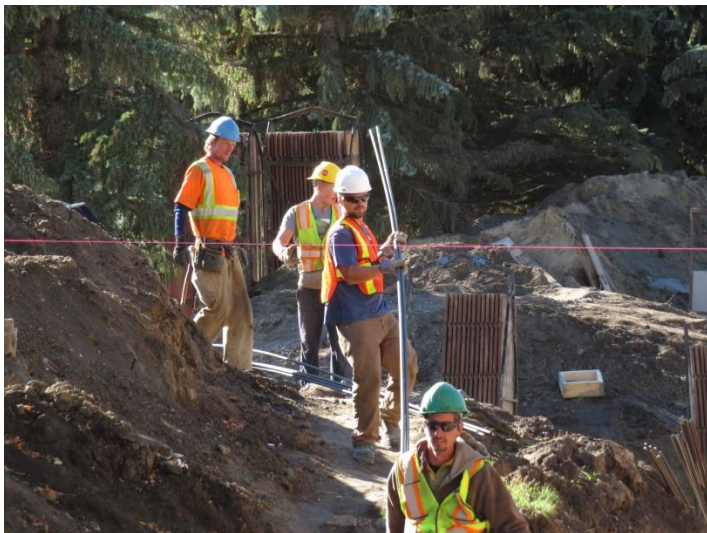

Forms being delivered and unloaded for North and East Wing foundation walls.

Beautiful Fall Day!

Observing progress
