

Furnaces & Hot Water Heaters

October 16, 2017

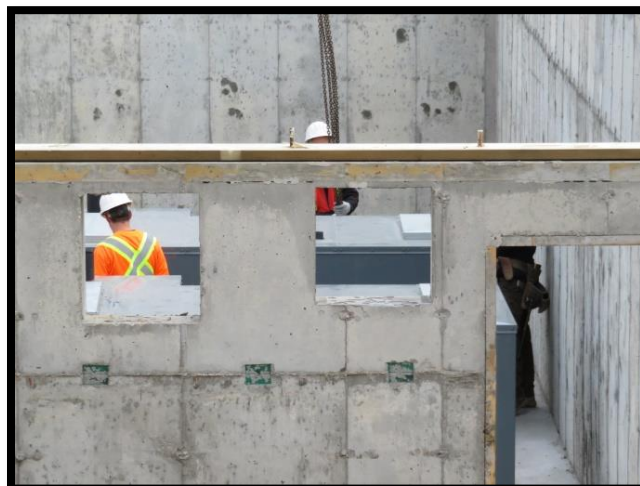

What excitement was in the air as the two furnaces and two hot water heaters were expertly lifted and lowered into their new home. Many hands were on deck to help with this task. Now they await their next assignment—to keep everyone warm, and bathed in the new Personal Care Home.

Here comes furnace #1 towards the basement.

Here comes furnace #2 . . .

The furnaces have both landed safely!

Now for the hot water heaters . . .

That's my boy operating the crane!!

Just the large floor joist to hoist yet—be careful!

Will it fit, yes, perfectly!

What a day!!
