

More Variety of Tasks

October 17 – 20

A variety of more tasks carried on for the next few days. The last couple of pictures were captured just before quitting time one evening of some of the crew that had been working on an additional water supply which will also cover water for the Personal Care Home.

Working on the floor in the "Common Room."

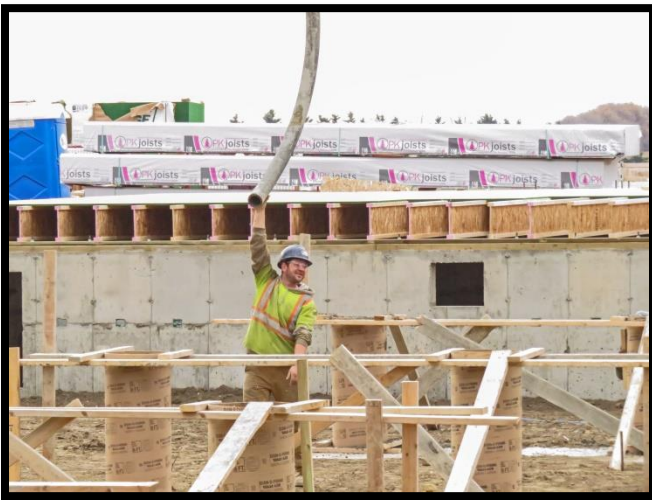

The floor which is over the furnaces and water heaters is mostly installed.

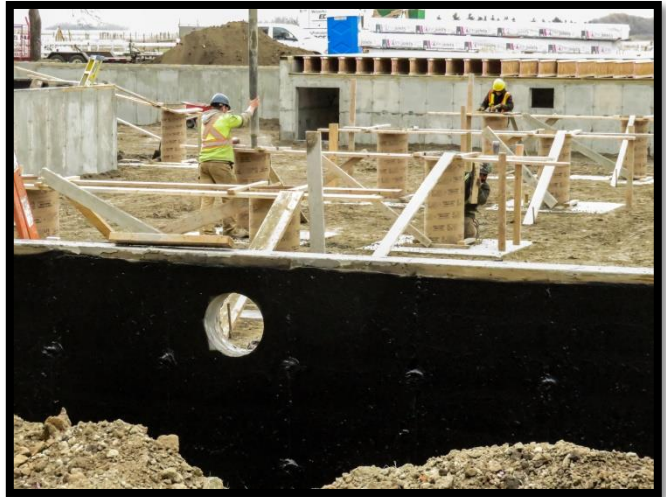

The chapel floor will come next.

Working on the last of the concrete, in the North Wing.

Waiting on the Boom Operator

The "Water Crew" at the end of day, end of week.
