

All About the Walls

Nov 27 – Dec 1

We've been waiting for the walls to go up and this is the week they began to rise!! Exciting week!

The first load of walls delivered which were built off site.

Very careful maneuvering was needed to get from the north gate of the site way over to the East Wing

Another delivery of walls to unload

More careful work to be done

Cleaning snow off the East Wing floor in preparation for putting up the wall framing

Untethering the big load of walls which was safely delivered

"Alright, men, let's do this!"

Up goes the FIRST section . . .

Now to the raising of the first wall . . . then so many quickly followed!

This is how the week ended on December 1, 2017
